

Research Results on the Effect of Biovin Liquid Combined with Wetttable Sulphur for supression of Powdery Mildew

Treatment	% leaf area not-infected	Treatment	grape yield (kg/plant)
No	2	No	3,78
Fungicide	79	Fungicide	3,61
Biovin+S	99	Biovin+S	4,66

Testing organization: University of Technology Vienna
 Location: Weingut Göttweig; Lower Austria;
 Infection Analysis: 29.09.1988
 Sample: 100 Wine Plants per condition
 Harvest: 14.10.1988
 Variety: Grüner Veltliner
 Fungicide: Mildew Product (Bayer)
 Biovin+S: 1% Biovin liquid + 0,5% Wetttable Sulphur
 Treatment Intervall: every 4 weeks
 Spray Volume: 400l per ha
